

Mobile Device Repairs (*Inc. iphones, Android, etc.*)

At Wildman Computers, whilst bringing you the latest I.T. equipment (as it becomes affordable), our experienced workshop team are developing new services to help you keep them repaired and maintained. We are happy to announce we can now offer screen repairs on some of the more popular mobile devices. Please check with our engineers if we can help you today.

Service 1: Parts Only (Fit yourself) - If you already feel comfortable in fitting the parts yourself, just ask our team for pricing and availability.

Example: iPhone screen and digitizer - £35 including VAT

Service 2: Parts and Fitting - For those who don't relish in taking apart their own pride and joy, our team of engineers is ready to help out. Any part we can supply, we can also fit for you. Typically this is done within a week of booking the device into our workshop.

Example: iPhone screen and digitizer with fitting - £60 including VAT

Service 3: But It's Urgent ! (*and immediate service is required*).

We understand that you may use your device for work, or simply can't bear to be without it for so long. Should it be desperate that you have the repair completed as fast as possible, we won't leave you in the lurch. For a little extra on the costs of repair, our team will provide a next working day service. Naturally such slots are limited in number, please ask if one is available when needed.

Example: iPhone screen and digitizer with 'next working day' fitting - £71 including VAT
